INTERNAL RISK FACTOR

BUSINESS RELATED RISKS

- 1. Our Company is currently listed only on the CSE, which does not have an active on-line market for trading of these Equity Shares and hence no benefit of listing and trading shall be available for shareholders of the Company.***

The Calcutta Stock Exchange Limited was established in the year 1908. However, in terms of the exit circular May 30, 2012, SEBI, vide its various exit orders, derecognized regional stock exchanges during the period January 2013 to June 2015 including Interconnected stock exchange and Over-The-Counter Exchange of India formed with the object of providing national level liquidity. The CSE has not been able to achieve the prescribed turnover on a continuing basis in terms of the Exit Policy. The explanation given for the failure to achieve such a turnover by the CSE is that SEBI had issued a notice dated April 3, 2013, under Section 12A of the Securities Contracts (Regulation) Act, 1956 regarding non-compliance of Regulation 3 of Securities Contracts (Regulation) (Stock Exchanges and Clearing Corporations) Regulations, and thereby stopping the clearing house facility of the CSE. Without the clearing house, the business of clearance has come to a stop, thereby preventing trade of securities at the CSE. As on date, the CSE is still a recognized stock exchange as it continues to meet certain guidelines specified by SEBI in the exit orders and circulars, however no trading is permitted on the said Exchange. Due to the said factor, there shall not be any active trading in the Rights Shares to be issued by the Company, and hence the shareholders shall not be able to enjoy the listing gains.

- 2. *Part of the Issue proceeds will be utilized by our Company for part - repayment of unsecured loans availed by our Company.***

One of the main objects of this Issue is to repay a portion of the unsecured loans availed by our Company from lenders. As on September 30, 2022, we have outstanding unsecured loans, including interest, aggregating to ₹ 1,447.59 Lakhs. To the extent that the issue proceeds will be used to repay the unsecured loans, no capital assets will be created in the Company. For further details on the repayment of unsecured loans availed from promoters, see “*Objects of the Issue*” beginning on page 44 of this Letter of Offer.

- 3. *We are exposed to the risk of delays or non-payment by our clients, which may also result in cash flow mismatches.***

We are exposed to counter party credit risk in the usual course of our business dealings with our clients who may delay or fail to make payments. For the Financial Years ending March 31, 2022 and March 31, 2021 our trade receivables were ₹3,030.48 lakhs and ₹3,654.07 lakhs, respectively and for the half-year period ended September 30, 2022 it was 3,479.41 lakhs. We may incur bad debts/ shall have to write off bad debts in future.

The financial condition of our clients may be affected by the performance of their business which may be impacted by several factors including general economic conditions. For instance, the on-going pandemic has led to a slowdown in the economy which may have directly/ indirectly impacted the industries in which our clients’ function. Due to the current scenario, we might be exposed to an increased risk of payment delays and/or defaults of payments. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our clients will be received in a timely manner or to that extent will be received at all. If any of our client’s default in making its payments, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company’s results of operations and financial condition.

- 4. *The steel industry is highly cyclical and a decrease in steel prices may have a material adverse effect on our business, results of operations, prospects and financial condition.***

Steel prices are volatile, reflecting the highly cyclical nature of the global steel industry. Steel prices fluctuate based on a number of factors, such as the availability and cost of raw material inputs, fluctuations in domestic and international demand and supply of steel and steel products, worldwide production and capacity, fluctuation in the volume of steel imports, transportation costs, protective trade measures and various social and political factors, in the economies in which the steel producers sell their products and are sensitive to the trends of particular industries, such as the automotive, construction, packaging, appliance, machinery, equipment and transportation industries, which are among the biggest consumers of steel products. When downturns occur in these economies or sectors, we may experience decreased demand for our products, which may lead to a decrease in steel prices, which may, in turn, have a material adverse effect on our business, results of operations, financial condition and prospects.

Global steel prices fell sharply in 2008 as the global credit crisis led to a collapse in global demand. If there is weakness in sectors of the economy that are substantial consumers of steel products, such as the construction and automobile industries would also hurt steel produce ₹ While steel prices have increased in recent years, they have been subject to fluctuation. Low steel prices adversely affect the businesses and results of operations of steel producers generally, including ours, resulting in lower revenue and margins and write downs of finished steel products and raw material inventories. In addition, the volatility, length and nature of business cycles affecting the steel industry have become increasingly unpredictable, and the recurrence of another major downturn in the industry may have a material adverse impact on our business, results of operations, financial condition and prospects.

In addition, substantial decreases in steel prices during periods of economic weakness have not always been balanced by commensurate price increases during periods of economic strength. Any sustained price recovery will most likely require a broad economic recovery, in order to underpin an increase in real demand for steel products by end use ₹

- 5. *Overcapacity and oversupply in the global steel industry may adversely affect our profitability.***

China is the largest steel producing country in the world by a significant margin, with the balance between its domestic production and demand being an important factor in the determination of global steel prices. In addition, Chinese steel exports may have a significant impact on steel prices in markets outside of China, including in the markets where we operate. Any production overcapacity and oversupply in the steel industry would likely cause increased competition in steel markets around the world which would likely lead to reduced profit margins for steel producers, and would also likely have a negative effect on our ability to increase steel production in general. No assurance can be given that we will be able to continue to compete in such an economic environment or that a prolonged stagnation of the global economy or production overcapacity will not have a material adverse effect on our business, results of operations, financial condition or prospects.

6. ***We derive a significant portion of our revenues from our top 5 (Five) customers, and any failure to maintain our relationships with such customers could have an adverse effect on our business, results of operations and profitability.***

We derive a significant portion of our revenues from top 5 (Five) customers of the Company. In the Financial Years 2021-2022 our top five customers accounted for 90% of our total revenue from operations. Our top five customers contribute a significant portion of our revenues. The loss of business derived from these customers or a significant reduction in, the revenues we receive from, one or more of these customers may adversely affect our business.

7. ***Developments in the competitive environment in the steel industry, such as consolidation among our competitors, could have a material adverse effect on our competitive position and hence our business, financial condition, results of operations or prospects.***

We believe that the key competitive factors affecting our business include product quality, changes in manufacturing technology, workforce skill and productivity, cash operating costs, pricing power with large buyers, access to funding, the degree of regulation and access to low-cost raw materials. Although we believe that we are a competitive steel producer, we cannot assure prospective investors that we will be able to compete effectively against our current or emerging competitors with respect to each of these key competitive factors.

In addition, our competitors may have lower leverage and stronger balance sheets. Larger competitors may also use their resources, which may be greater than ours, against us in a variety of ways, including by making additional acquisitions, investing more aggressively in product development and capacity and displacing demand for our export products. The market is still highly fragmented, and if the trend towards consolidation continues, we could be placed in a disadvantageous competitive position relative to other steel producers and our business, results of operations, financial condition and prospects could be materially and adversely affected. In addition, a variety of known and unknown events could have a material adverse impact on our ability to compete. For example, changes in the level of marketing undertaken by competitors, governmental subsidies provided to foreign competitors, dramatic reductions in pricing policies, exporters selling excess capacity from markets such as China, Ukraine and Russia, irrational market behavior by competitors, increases in tariffs or the imposition of trade barriers could all affect our ability to compete effectively. Any of these events could have a material adverse impact on our business, results of operations, financial condition and prospects.

8. ***We face competition in our businesses, which may limit our growth and prospects.***

Our Company faces competition in the industry that we are involved in. We compete with other companies, both in India and abroad. We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Greater brand recognition among consumers;
- Larger customer bases in and outside India;
- More diversified operations which allow profits from certain operations to support others with lower profitability; or
- More experience and expertise.

These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

9. *The steel industry is characterized by a high proportion of fixed costs and volatility in the prices of raw materials and energy, including mismatches between trends in prices for raw materials and steel, as well as limitations on or disruptions in the supply of raw materials, which could adversely affect our profitability.*

Steel production requires substantial amounts of raw materials and energy, including iron ore, coking coal and coke, scrap and power, which are subject to significant price volatility. The production of steel is capital intensive, with a high proportion of fixed costs to total costs. Consequently, steel producers generally seek to maintain high capacity utilization. If capacity exceeds demand, there is a tendency for prices to fall sharply if supply is largely maintained. Conversely, expansion of capacity requires long lead times so that, if demand grows strongly, prices increase rapidly, as unutilized capacity cannot be brought on line as quickly. The result can be substantial price volatility.

Volatility in the prices of raw materials and energy, including mismatches between trends in prices for raw materials and steel, and limitations on, or disruptions in, supply of raw materials could adversely affect our profitability. The availability and prices of raw materials may be negatively affected by, among other factors, new laws or regulations; suppliers' allocations to other purchasers; business continuity of suppliers; interruptions in production by suppliers; accidents or other similar events at suppliers' premises or along the supply chain; wars, natural disasters and other similar events; fluctuations in exchange rates; consolidation in steel-related industries; the bargaining power of raw material suppliers and the availability and cost of transportation. The raw materials industry is highly concentrated and suppliers in recent years have had significant pricing power. Further consolidation among suppliers would exacerbate this trend. Since 2010, raw materials suppliers began to move towards sales based on quarterly prices rather than annually priced contracts under which steel producers face increased exposure to production cost and price volatility. This change may in turn reduce the steel producers' access to reliable supplies of raw materials.

In recent years, many steel companies have been focused on acquiring raw materials around the world in an effort to limit their exposure to the volatility and instability of the markets for raw materials. To the extent such companies use these raw materials in their own steel production, these acquisitions will further limit the supply of these raw materials available for purchase in the global markets. Any prolonged interruption in the supply of raw materials or energy, or failure to obtain adequate supplies of raw materials or energy at reasonable prices or at all, or increases in costs which we are unable to pass on to our customers, could have a material adverse effect on our business, financial condition, results of operations or prospects.

Despite the high correlation between steel and raw material prices, with both having experienced significant declines during the global economic crisis, there can be no assurance that this correlation will continue. If raw materials and energy prices rise significantly (either as a result of supply constraints or other reasons) but prices for steel do not increase commensurately, it would have a material adverse effect on our business, financial condition, results of operations and prospects.

In addition, energy costs, including the cost of electricity and natural gas, represent a substantial portion of the cost of goods sold by steel producers generally, including us. Historically, energy prices have varied significantly, and this trend may continue due to market conditions and other factors beyond the control of steel producers. As the production of direct reduced iron and the re-heating of steel involve the use of significant amounts of energy, steel producers are sensitive to energy prices and are dependent on having access to reliable supplies.

10. *We depend significantly on sales in India, any decrease in which will adversely affect our business, revenue, results of operations and cash flows.*

In the Financial Year 2021-2022 and September 30, 2022, we derived 26,077.18 lakhs, constituting 60.39% and 13450.72 lakhs, constituting 52.08%, respectively of our revenue from operations from India. Existing and potential competitors may increase their focus on India, which could reduce our market share. For example, our competitors may intensify their efforts to capture a larger market share by undertaking aggressive pricing strategies and increasing their focus on product development. If we are unable to compete effectively in India, it could adversely affect our sales

volumes and pricing levels for our products in India, as well as erode our market share. In the event that we experience adverse effects on our sales volumes or pricing levels, or loss of market share, due to increased competition or otherwise, it could adversely affect our business, revenue, results of operations and cash flows.

11. *Inability to obtain, renew or maintain the statutory and regulatory permits, licenses and approvals required to operate our business could have a material adverse effect on our business.*

We require certain statutory and regulatory permits, licenses and approvals for our business in each of the jurisdictions in which we operate. There can be no assurance that the relevant authorities will issue such permits or approvals in the time frame anticipated by us or, at all. For further details, please see the sections entitled, “*Outstanding Litigation and Defaults*” beginning on page 102 and “*Government and Other Approvals*” on page 107 of this Letter of Offer. If we are unable to obtain and maintain the requisite licenses in a timely manner or at all, or to renew or maintain existing permits or approvals, or comply with the terms and conditions prescribed in such permits or approvals, it may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations. For details of major pending approvals and licenses in relation to our major operational facilities, please see the section entitled, “*Government and Other Approvals*” on page 107 of this Letter of Offer.

12. *Our Company does not own the premise on which our Registered Office is located.*

Our Company does not own the Premises of Registered office and is taken on rent. If we are unable to renew the lease or if the lease is not renewed on favourable conditions, it may affect our operations adversely. Also, if we do not comply with certain conditions of the lease agreement, it may lead to termination of the lease. In the event of non-renewal or termination of the lease, we may have to vacate our current premises and shift to new premises. There can be no assurance that we shall be able to find a suitable location, or one at present terms and conditions. Any additional burden due to shifting of premises or increased rental expenses, may adversely affect our business operations and financial conditions.

13. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payment for the services provided by us, on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. All of these factors may result, or have resulted, in increase in the number of receivables and short-term borrowings. Continued increase in working capital requirements may adversely affect our financial condition and results of operations. We may also have large cash flows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims. Moreover, we may require additional finance facility in the future to satisfy our working capital needs.

14. *Our contingent liabilities could adversely affect our financial condition.*

For the half-year ending period on September 30, 2022, and for the Financials Years ending on March 31, 2022, and March 31, 2021 the contingent liabilities that had not been provided for, details of the same as under:

i. There are contingent liabilities in respect of:

		<i>(Amount ₹ in Lakhs)</i>		
Sl. No.	Particulars	September 30, 2022	March 31, 2022	March 31, 2021
a.	Sales Tax & Excise Duty matters under dispute/appeal	63.85	34.90	42.77
b.	Bank Guarantees outstanding	49.11	86.06	101.93

Except the aforementioned there are no other Contingent Liabilities including additional demands in respect of Income Tax/Excise Duty/Service Tax / Sale Tax/VAT, which have been contested by the Company.

Our contingent liabilities may become actual liabilities. In the event that any of our contingent liabilities materialize, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current fiscal year or in the future. For further details, see section titled “Financial Information” on page 66 of this Letter of Offer.

- 15. *As the securities of our Company are listed on Stock Exchange in India, our Company is subject to certain obligations and reporting requirements under the SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.***

The Equity Shares of our Company are listed only on the Calcutta Stock Exchange Limited and therefore we are subject to the obligations and reporting requirements prescribed under the SEBI Listing Regulations. Our Company endeavours to comply with all such obligations/reporting requirements any delay in complying with the same may result in the Stock Exchange and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act/ Rules and Regulations/ Circulars made there under. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares. We have however, been in compliance with the SEBI Listing Regulations for the past 12 months and therefore, this Letter of Offer is prepared and submitted in terms of Part B of Schedule VI to the SEBI ICDR Regulations.

- 16. *Our Promoter, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.***

Our Promoter, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, equity shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. For further details please refer to “Related Party Disclosures” on page 90 of the Standalone Financial Statements of this Letter of Offer.

There can be no assurance that our Promoter, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoter and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

- 17. *Our Promoter and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.***

After the completion of the Issue, our Promoter and the members of the Promoter Group will hold approximately 39.60% of the paid-up equity share capital of our Company assuming full subscription to the Rights Entitlement in the Issue. Our Promoter and the members of the Promoter Group holding Equity Shares in our Company, have undertaken to fully subscribe for their Rights Entitlement. They reserve the right to subscribe for their Rights Entitlement pursuant to any renunciation made by any member of the Promoter Group to another member of the Promoter Group. Such subscription for Rights Shares over and above their Rights Entitlement, if allotted, may result in an increase in their percentage shareholding above their current percentage shareholding. So long as the Promoter has a majority holding, they will be able to elect the entire Board and control most matters affecting us, including the appointment and removal of the officers of our Company, our business strategy and policies and financing. Further, the extent of the Promoter’s shareholding in our Company may result in the delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the other shareholders of our Company.

- 18. *If industry-wide steel inventory levels are high, customers may draw from inventory rather than purchase new products, which would reduce our sales and earnings.***

Above-normal industry inventory levels can cause a decrease in demand for our products and thereby adversely impact our earnings. High industry-wide inventory levels of steel reduce the demand for production of steel because customers can draw from inventory rather than purchase new products. This reduction in demand could result in a corresponding reduction in prices and sales, both of which could contribute to a decrease in earnings. Industry-wide inventory levels of steel products can fluctuate significantly from period to period.

19. *As we generate revenue and incur expenses in multiple currencies, exchange rate movements may have an adverse effect on our results of operations and cash flows.*

We have foreign currency exposure related to foreign-denominated revenues and costs, including export sales and costs of imported equipment and material. For example, in Financial Year 2021-2022, our earnings in foreign currency on an accrual basis were ₹ 16,443.89 lakhs, and our expenditure in foreign currency was ₹ 20.86 lakhs. We expect that our foreign currency exposure will increase as our business grows. Significant currency exchange rate fluctuations and currency devaluations could have an adverse effect on our results of operations and cash flows from period to period.

20. *The production of steel is capital intensive, with long gestation periods.*

The production of steel is capital intensive, with a high proportion of investment in fixed assets such as land, plant and machinery. Further, setting up of new capacities or expansion of existing capacities require long lead times. If total capacity in the industry exceeds demand, there is a tendency for prices to fall sharply if supply is largely maintained. Conversely, if demand grows strongly, prices increase rapidly, as unutilized capacity cannot be brought on line as quickly. The result can be substantial price volatility. While we have taken steps to reduce operating costs, we may be negatively affected by significant price volatility, particularly in the event of excess production capacity in the global steel market, and incur operating losses as a result.

21. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of March 31, 2022 and September 30, 2022, we have entered into several related party transactions with our Promoter and entities forming a part of our Promoter Group, our Directors and the entities in which they hold directorships. In addition, we have in the past also entered into transactions with other related parties. Our Company has entered into related party transactions for the Fiscal ended March 31, 2022 For further details, please refer to the *Related Party Disclosures*” on page 90 of the Standalone Financial Statements of this Letter of Offer.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

22. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of equity shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

23. *Our success largely depends upon the knowledge and experience of our Promoter, Directors and our Key Managerial Personnel. Loss of any of our directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

Our Company depends on the management skills and guidance of our Promoter and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel. Some of our employees have been associated with our Company since a long period of time and have been integral to the growth and in the success of our Company. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Directors or Key Managerial Personnel are unable or unwilling to continue in his/ her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected. There is significant competition for management and other skilled personnel in the industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages and incentives to such Key Managerial Personnel. In the event we are not able to attract and retain talented employees, as required for conducting our business, or we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and operations may be adversely affected. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled - “Our Management” on page 62 of this Letter of Offer.

24. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as, fire, riots and natural disasters. Presently, we have obtained certain policies such as standard fire and special perils policy. The said policies insure our building, furniture, fittings, electrical installation, office equipment, stationery, meter wires, cables, godown, meeting rooms, building superstructure, any other office contents, from earthquake, fire, shock, terrorism, etc.; There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

25. *Environmental matters, including compliance with laws and regulations and remediation of contamination, could result in substantially increased capital requirements and operating costs.*

Our businesses are subject to numerous laws, regulations and contractual commitments relating to the environment in which it operates and our operations generate large amounts of pollutants and waste, some of which are hazardous. These laws, regulations and contractual commitments concern air emissions, wastewater discharges, solid and hazardous waste material handling and disposal, and the investigation and remediation of contamination or other environmental restoration. The risk of substantial costs and liabilities related to compliance with these laws and regulations is an inherent part of our business. Facilities currently or formerly owned or operated by us, or where wastes have been disposed or materials extracted, are all subject to risk of environmental cost and liabilities, which includes the costs or liabilities relating to the investigation and remediation of past or present contamination or other environmental restoration. In addition, future conditions and contamination may develop, arise or be discovered that create substantial environmental compliance, remediation or restoration liabilities and costs despite our efforts to comply with environmental laws and regulations, violations of such laws or regulations can result in civil and/or criminal penalties being imposed, the suspension of permits, requirements to curtail or suspend operations, lawsuits by third parties and negative reputational effects. There can be no assurance that substantial costs and liabilities will not be incurred in the future. For further details of material disputes related to our mining operations, please see the section entitled, “Outstanding Litigation and Defaults” beginning on page 102 of this Letter of Offer.

An increase in the requirements of environmental laws and regulations, increasingly strict enforcement thereof by governmental authorities, or claims for damages to property or injury to persons resulting from the environmental impacts of our operations or past contamination, could prevent or restrict some of our operations, require the expenditure of significant funds to bring us into compliance, involve the imposition of cleanup requirements and reporting obligations, and give rise to civil and/or criminal liability.

There can be no assurance that any such legislation, regulation, enforcement or private claim will not have a material adverse effect on our business, financial condition or results of operations. In the event that production at one of our facilities is partially or wholly disrupted due to this type of sanction, our business could suffer significantly and our results of operations and financial condition could be materially and adversely affected.

In addition, our current and future operations may be located in areas where communities may regard our activities as having a detrimental effect on their natural environment and conditions of life. Any actions taken by such communities in response to such concerns could compromise our profitability or, in extreme cases, the viability of an operation or the development of new activities in the relevant region or country.

26. *Any change in existing government policies providing support to steel manufactures, or new policies withdrawing support presently available could adversely affect our business and results of operations.*

Any change in existing government policies providing support to steel manufactures, or new policies withdrawing support presently available, in the jurisdictions in which we have operations could adversely affect the supply and demand balance and the competitive environment. For example, in February, 2016, the Government of India announced a minimum import price on 173 steel products to prevent dumping of steel products. Subsequently, the minimum import price was discontinued and the Government of India imposed anti-dumping duties on steel products with effect from August, 2016 for a period of five years. Similarly, in February 2016, the European Union announced provisional antidumping duties on cold-rolled flat steel from China and Russia. If any such measures are withdrawn or not renewed upon expiry, it may adversely affect the competitive environment and we cannot assure you that we would be able to pass on any resultant increase in costs to our customers, which could adversely affect our business and results of operations.

27. *Our steel manufacturing operations are hazardous processes that can cause personal injury and loss of life, severe damage to property and equipment as well as environmental damage, which could cause us to incur significant costs and liabilities and may damage our reputation.*

We are subject to a broad range of health and safety laws and regulations in each of the jurisdictions in which we operate. These laws and regulations, as interpreted by the relevant agencies and the courts, impose increasingly stringent health and safety protection standards. The costs of complying with, and the imposition of liabilities pursuant to, health and safety laws and regulations could be significant, and failure to comply could result in the imposition of civil and/or criminal penalties, the suspension of permits or operations and lawsuits by third parties.

Despite our efforts to monitor and reduce accidents at our facilities, there remains a risk that health and safety incidents may occur. Such incidents could include explosions or gas leaks, fires or vehicular accidents and other incidents involving mobile equipment or exposure to potentially hazardous materials. Due to the nature of our business, certain incidents can and do result in employee fatalities. Some of our industrial activities involve the use, storage and transportation of dangerous chemicals and toxic substances, and we are therefore subject to the risk of industrial accidents which could have significant adverse consequences for our workers and facilities, as well as the environment. Such incidents could lead to production stoppages, the loss of key assets, or put employees at risk (and those of sub-contractors and suppliers) or persons living near affected sites. In addition, such incidents could damage our reputation, leading to the rejection of products by customers, devaluation of the brand and diversion of management time into rebuilding and restoring its reputation.

28. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

- 29. *We are subject to risk of fraud, theft, embezzlement by our employees, contractors and customers, employee negligence or similar incidents may adversely affect our results of operations and financial condition.***

Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during stocking. We may also encounter some inventory loss on account of employee/contractor/vendor fraud, theft, embezzlement and general administrative error. Although, we have set up various security measures, including tagging our products, CCTV in our offices and the existing manufacturing facility at Howrah and Durgapur, deployment of security guards and follow stringent operational processes such as periodic stock taking there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition.

- 30. *Increased competition for skilled employees and salary increases for our employees may reduce our profit margin.***

Due to sustained economic growth in India and increased competition for skilled employees in India over the last few years, wages of skilled employees are increasing at a fast rate. Accordingly, we may need to increase our levels of employee compensation rapidly to remain competitive in attracting the quality of employees that our business requires. Salary increases may reduce our profit margins and have a material and adverse effect on our results of operations.

- 31. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.***

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “Industry Overview” on Page 53 of this Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Letter of Offer. Further, the industry data mentioned in this Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

- 32. *We have not been paying dividends in the past and our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. We have not paid dividends in the past and there can be no assurance that our Company will declare dividends in the future also.

- 33. *Our business is dependent on our continuing relationships with our customers and suppliers who can suspend or cancel delivery of products.***

Events of force majeure such as disruptions of transportation services because of weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure and port facilities, government actions or other events that are beyond the control of the parties and allow our suppliers to suspend or cancel deliveries of raw materials could impair our ability to source raw materials and components and to supply our products to customers. Similarly, our customers may suspend or cancel delivery of our products during a period of force majeure and any suspensions or cancellations that are not replaced by deliveries under new contracts or sales to third parties on the spot market would reduce cash flows and could adversely affect our financial condition and results of operations. There can be no assurance that such disruptions will not occur.

- 34. *Product liability claims could adversely affect our operations.***

We sell products to major manufacturers who are engaged to sell a wide range of end products. Furthermore, our products are also sold to, and used in, certain safety-critical applications. If we were to sell steel that does not meet specifications or the requirements of the application, it could result in significant disruptions to the customer's production lines could result. There could also be significant consequential damages resulting from the use of such products. We have a limited amount of product liability insurance coverage, and a major claim for damages related to products sold could leave us uninsured against a portion or all of the award and as a result, materially harm our financial condition and future operating results.

ISSUE SPECIFIC RISKS

- 35. *SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021 and October 01, 2021, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021 and October 01, 2021 and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see "Terms of the Issue" on page 115 of this Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Right Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account titled as 'CSIL – RIGHTS ENTITLEMENT UNCLAIMED SUSPENSE ACCOUNT' opened by our Company, for the Eligible Shareholders which would comprise Rights Entitlements relating to: (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) The demat accounts of the Eligible Equity Shareholder which are frozen or suspended for debit or credit or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) Equity Shares held by Eligible Equity Shareholders holding Equity Shares in the physical form on Friday, April 07, 2023 being the Record Date the details of demat accounts are not provided by Eligible Equity Shareholders to our Company or Registrar; or (e) Credit of the Rights Entitlements returned/reversed/failed; or (f) The ownership of the Equity Shares currently under dispute, including any court proceedings.

- 36. *Investors shall not have the option to receive Right Shares in physical form.***

In accordance with the provisions of Regulation 77A of the SEBI ICDR Regulations read with SEBI Rights Issue Circular, the credit of Rights Entitlement and Allotment of Right Shares shall be made in dematerialized/ demat form only. Investors will not have the option of getting the allotment of Equity Shares in physical form.

- 37. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form may lapse in case they fail to furnish the details of their demat account to the Registrar.***

In accordance Regulation 77A of the SEBI ICDR Regulations read with the SEBI Circular SEBI/HO/CFD/DIL2/CIR /P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018, issued by the SEBI, with effect from April 1, 2019, a transfer of listed

Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares). For further details, please refer to the section titled 'Terms of the Issue' on page no. 115 of this Letter of Offer.

38. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncees prior to the Issue Closing Date. The Equity Shares of our Company are exclusively listed on the CSE. Since the trading platform of the CSE is not functional, the Applicants shall not be able to deal in the Rights Entitlements using the secondary market platform of CSE. The Investors may renounce the Rights Entitlements, credited to their respective demat accounts, either in full or in part through an off-market transfer, during the Renunciation Period. Such renunciation shall result in renouncement of the Right Shares. The Investors should have the demat Rights Entitlements credited/lying in his/her own demat account prior to the renunciation.

39. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

40. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

41. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake

such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

42. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

43. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS:

1. *The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe epidemic caused due to viruses (particularly the Novel Coronavirus) or another wave of the Novel Coronavirus could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of Novel Corona virus has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding Novel Coronavirus and no government-certified treatment is available. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of Novel Coronavirus remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our require us to quarantine some or all of these employees were suspected of contracting Novel Coronavirus or any other epidemic disease, this could employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of Novel Coronavirus will cause an economic slowdown and it is possible that it could cause a global recession. The spread of Novel Coronavirus has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed.

The extent to which the Novel Coronavirus further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the

coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact Novel Coronavirus may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of Novel Coronavirus or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which Novel Coronavirus impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

2. Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards (“IFRS”), which investors may be more familiar with and consider material to their assessment of our financial condition.

Our audited summary statements of assets and liabilities as at March 31, 2022 and audited summary statement of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscal 2022 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note. We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Audited Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader’s level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited. Non-compliance or delay in implementation of the provisions of safety laws and regulations, which may lead to stoppage of operations, damage to assets and loss of reputation.

3. Political, economic or other factors that are beyond our control may have adversely affected our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

Withdrawal of favorable trade measures such as minimum import prices, antidumping laws, countervailing duties and tariffs, trade restrictions may impact profitability, stringent regulations and compliances resulting in liabilities and damage to our reputation. Non-renewal of mining leases compelling higher purchases from open market at higher prices, adversely impacting profitability

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, and volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and

high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

4. A slowdown in economic growth in India could cause our business to suffer.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- Political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

5. Financial instability in both Indian and international financial markets could adversely affect our Results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business. Technology disruptions and shifting customer preferences to alternatives are adversely impacting earnings.

The Indian financial market and the Indian economy also influenced by economic and market conditions, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections. Technology disruptions and shifting customer preferences to alternatives are adversely impacting earnings.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on

the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

6. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future. Withdrawal of favorable trade measures such as minimum import prices, antidumping laws, countervailing duties and tariffs, trade restrictions may impact profitability, stringent regulations and compliances resulting in liabilities and damage to our reputation. Non-renewal of mining leases compelling higher purchases from open market at higher prices, adversely impacting profitability

7. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required.

Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

8. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favorable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

9. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Non-compliance to stringent environmental conditions leading to penalties, stoppage of operations and loss of reputation Climate change related regulations and extreme weather events may disrupt operations and supply chain. Breach of information security incidents leading to business disruption and damage to reputation. Non-compliance to IT legislations and regulations leads to penalties.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares

10. Adverse geopolitical conditions such as increased tensions between India and its neighboring countries, could adversely affect our business, results of operations and financial condition.

Adverse geopolitical conditions such as increased tensions between India and its neighbouring countries, resulting in any military conflict in the region could adversely affect our business and operations. Such events may lead to countries including the Government of India imposing restrictions on the import or export of products or raw materials, among others, and affect our ability to procure raw materials required for our manufacturing operations. We could also be affected by the introduction of or increase in the levy of import tariffs in India, or in the countries to which we export our products, or changes in trade agreements between countries. For instance, the Government of India has imposed additional tariffs in the nature of countervailing duty and anti-dumping duty on a number of items imported from China. Any such measure which affects our raw material supply or reciprocal duties imposed on Indian products by China or other countries may adversely affect our results of operations and financial condition.

11. We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- hostile or war like situations with the neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

Details of the Objects of the Issue

1. Repayment in part of unsecured loans availed by our Company from lenders

Our business is predominantly working capital intensive. We fund the majority of our working capital requirements in the ordinary course of our business from our internal accruals and unsecured borrowing from associates or group companies or other lenders. These unsecured borrowings carry relatively higher interest cost. We operate in a highly competitive and dynamic market conditions and may have to revise our estimates from time to time on account of external circumstances, business or strategy, foreseeable opportunity. The rationale for repaying these unsecured loans is, inter alia, to reduce our outstanding obligation and the interest cost. We believe such repayment of unsecured loans apart from reducing our cost of finance will also significantly augment our ability to deploy resources for further investment in our business and reduce our dependency on debt. The exponential growth in our segments and the consistent increase in the performance in this sector have provided our company an opportunity to utilize its growing potential for expansion in the coming year. By reducing debt and interest cost, our Company will have enhanced financial strength to capitalize the growing potential in the industry. We believe that such repayment will enable our Company to significantly augment our ability to deploy internal accruals towards meeting our working capital requirements and towards further investments into our business, along with significantly increasing our ability to raise resources for future investments and asset creation by way of equity, loans and working capital facilities. We propose to utilise ₹ 5,000.00 Lakhs from the Net Proceeds of the Issue for repayment of unsecured loan availed by our Company. Our Statutory Auditors have provided a certificate dated 03.12.2022 confirming the amount outstanding as Unsecured Loan is ₹ 1,447.59 Lakhs as on 30.09.2022, which is payable on demand to the lenders.

Given the nature of these borrowing facilities and the terms of repayment, the aggregate outstanding unsecured loan amounts may vary from time to time. In addition to the above, we may, from time to time, enter into further financing arrangements to avail unsecured loans. In such cases or in case any of the above unsecured loans are paid or further unsecured loans have been availed prior to the completion of the Issue, we may utilise Net Proceeds of the Issue towards repayment or prepayment of such additional unsecured loans.

2. Augmenting our Working Capital Requirements

We fund a majority of our working capital requirements in the ordinary course of business from internal accruals. We propose to utilise ₹ 1,081.00 Lakhs from the Net Proceeds of the Issue to fund the working capital requirements of our Company in Fiscal Year 2023-2024.

3. General Corporate Purposes:

In terms of Regulation 62(2) of the SEBI ICDR Regulations, the extent of the Issue Proceeds proposed to be used for general corporate purposes shall not exceed 25% of the Gross proceeds of the Issue. SECTION VI – ABOUT THE COMPANY

DESCRIPTION OF THE INDUSTRY

The information presented in this section has been obtained from publicly available documents from various sources, including officially prepared materials from the Government of India and its various ministries, industry websites and publicly available industry reports. Industry websites and publications generally state that the information contained therein has been obtained from sources believed to be reliable but their accuracy and completeness are not guaranteed and their reliability cannot be assured. Although we believe industry, market and government data used in this Letter of Offer is reliable, it has not been independently verified.

Accordingly, Our Company and the Lead Manager do not take any responsibility for the data, projections, forecasts, conclusions or any other information contained in this section. Certain information contained herein pertaining to prior years is presented in the form of estimates as they appear in the respective reports/ source documents. The actual data for those years may vary significantly and materially from the estimates so contained.

INDUSTRY OVERVIEW

As of April 2022, India was the world's second-largest producer of crude steel, with an output of 10.14 MT. In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. The growth in the Indian steel sector has been driven by the domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is modern, with state-of-the-art steel mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels. The Indian steel industry is classified into three categories - major producers, main producers and secondary produce[₹]

Global Overview

The global economy grew by 5.9% in 2021 following a contraction of 3.1% in 2020 (Source: IMF World Economic Outlook, January 2022). Countries across the globe focused on vaccination coverage and implemented various economic stimuli to minimize the impact of COVID-19 and hasten economic recovery.

The growth momentum started slowing towards the end of 2021, as the effects of fiscal and monetary stimuli dissipated. The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have re-imposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies.

The global steel industry has partially recovered with increase in global steel production by 3.7% during 2021, compared to 2020. This is primarily due to economies opening up after wide scale vaccinations, gradual commencement of economic activity, and significant change in retail consumer behaviour mainly in automotive and construction sectors. Further, increase in raw material prices mainly concerning coking coal, iron ore and oil & fuel have pushed the market prices of steel.

World crude steel production 1950 to 2021 (million tonnes)

www.worldsteel.org

Global crude steel production reached at 1,951 million tonnes (Mt) in 2021, which was higher by around 70 Mt than 2020. While China continued to be the largest global crude steel producer, there were moderate growth in steel production in countries such as India, Japan, USA, Germany and Brazil, amongst others, signifying normalcy in operations during the pandemic.

World crude steel production for the 64 countries reporting to the World Steel Association (worldsteel) was 161.0 million tonnes (Mt) in March 2022, a 5.8% decrease compared to March 2021.

Indian Overview

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

As per reports of India Brand Equity Foundation (IBEF), some of the recent economic developments in India are as follows:

- India is the third-largest unicorn base in the world with over 100 unicorns with a total valuation of US\$ 332.7 billion.
- According to data from the Department of Economic Affairs, as of January 28, 2022, foreign exchange reserves in India reached the US\$ 634.287 billion mark.
- With an improvement in the economic scenario, there have been investments across various sectors of the economy. The private equity - venture capital (PE-VC) sector recorded investments worth US\$ 5.8 billion across 117 deals in February 2022, 24% higher than in January 2022.
- According to the Department for Promotion of Industry and Internal Trade (DPIIT), FDI equity inflow in India stood at US\$ 572.80 billion between April 2000 - December 2021.

From the fledgling one million tonne capacity status at the time of independence, India has now risen to be the 2nd largest crude steel producer in the world and the largest producer of sponge iron. From a negligible global presence, the Indian steel industry is now globally acknowledged for its product quality. As it traversed its long history since independence, the Indian steel industry has responded to the challenges of the highs and lows of business cycles.

Opportunities, threats, risks and concern

Opportunities

Steel is crucial in the development of the infrastructure of any economy. Steel is a commodity that is used in our day-to-day life. It is used in constructing homes we live in, the cars we drive, the utensils we eat in, etc. Steel finds usage in various sectors including construction and infrastructure, engineering, automobiles, etc. It is an important engineering and construction material. Steel is widely used all around the world because of its strength and it can be recycled over and over again without loss of its property.

The steel industry derives its demand from other important sectors like infrastructure, aviation, engineering, construction, automobile, etc.

- **Capital Goods:** The capital goods sector accounts for 11% of steel consumption and is expected to increase 14-15% by FY2025-26 and has the potential to increase in tonnage and market share.
- **Automotive Industry:** The Automotive industry accounts for around 10% of demand of steel in India. It is forecasted to grow in size to US\$ 260-300 billion by 2026. Demand from the sector for steel is expected to be robust.
- **Infrastructure sector:** The Infrastructure sector accounts for 9% of steel consumption and expected to increase 11% by FY2025-26. Because of rising investments in infrastructure, the demand for long steel products would increase in the years ahead.
- **Railways:** laying of tracks and construction of foot over bridges, rail coaches, railway stations will also drive the steel demand.
- **Airport:** The number of operational airports stood at 103 as on 31st March 2019.. Under union budget 2020, Government is targeting 100 more airports by FY2024. Development of new airports in Tier-II city would sustain consumption growth.

Threats, risks and concern

The industry operates in a dynamic environment which not only provides opportunities but also exposes the business to various risks.

The world economy continues to suffer from a series of destabilizing shocks. After more than two years of pandemic, the Russian Federation's invasion of Ukraine and its global effects on commodity markets, supply chains, inflation, and financial conditions have steepened the slowdown in global growth.

Elevated inflation is expected to persist longer, with ongoing supply chain disruptions and high energy prices continuing in 2022. Risks to the global baseline are tilted to the downside which is primarily brought by the new COVID-19 variant which may prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures have enhanced the uncertainty around inflation and policy paths. Other global risks may crystallize with the surging geopolitical tensions, and the ongoing adverse climate conditions leading to the probability for natural disaster.

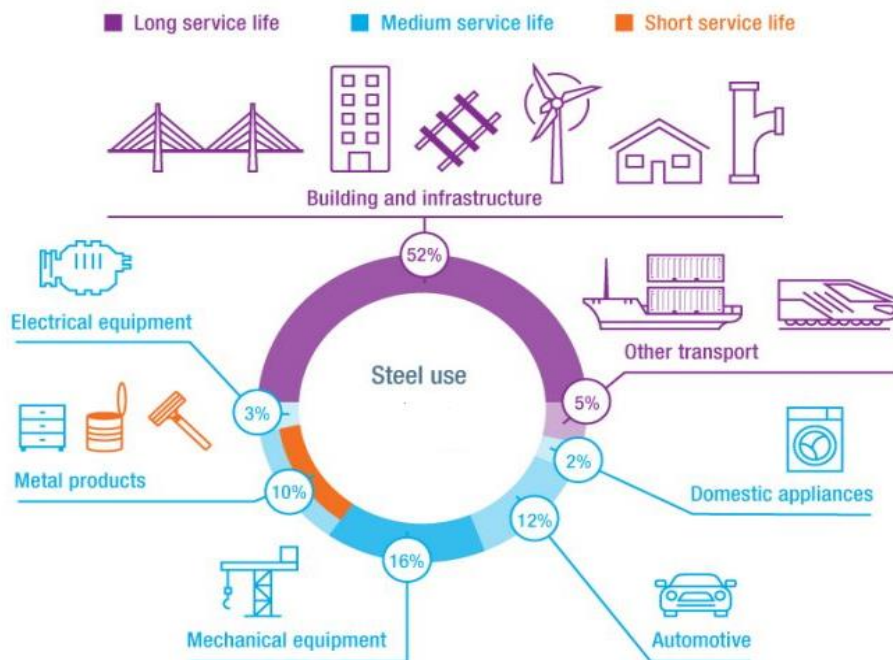

The export duty, imposed to check rising inflation in the country, has resulted in volatile steel prices in the domestic market. Most domestic steel makers are under margin pressure due to rise in input cost and are concerned with the availability of raw materials. Anticipated high interest rates might limit the growth in private demand. The industry still has huge dependence on imported coking coal, low production efficiency, inadequate infrastructure & technology. The steel industry is challenged by dwindling investments, turbulence in the financial market and geopolitical conflicts in many developing regions.

Outlook

Global growth is projected to slow-down from an estimated 6.1% in 2021 to 3.6% in 2022—0.8 percentage-point lower than what was envisioned in the last World Economic Outlook (WEO) of January 2022, largely reflecting forecast markdowns in USA and China. In USA, a revised assumption of removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages have induced a downgrade in the outlook by 1.2 percentage-points. In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow down to 3.6% in 2023.

As populations grow and nations around the world seek to improve their standards of living, it is inevitable that the demand for steel will increase. Steel is critical simply because no other material has the same unique combination of strength, formability and versatility. New generations of steel continue to be developed that make it possible for manufacturers and builders to implement durable, lightweight designs. Without being aware of it, society now depends on steel. Humankind's future success in meeting challenges such as climate change, poverty, population growth, water distribution and energy limited by a lower carbon would depends on applications of steel.

As per world steel association, despite the sporadic COVID infection waves and the manufacturing sector's supply chain constraints, steel demand recovered strongly in 2021, especially in the EU and the US. However, the outlook for 2022 has weakened due to inflationary pressure, which is further reinforced by the events surrounding Ukraine. The impact of the war will be particularly pronounced in the EU due to its high dependence on Russian energy and refugee inflows. Steel demand in the developed world is forecast to increase by 1.1% and 2.4% in 2022 and 2023 respectively, after recovering by 16.5% in 2021.

World steel forecasts that steel demand will grow by 0.4% in 2022 to reach 1,840.2 Mt after increasing by 2.7% in 2021. In 2023 steel demand will see further growth of 2.2% to reach 1,881.4 Mt.

The Members of **Chandi Steel Industries Limited**
Report on the Standalone Financial Statements

Opinion

We have audited the accompanying Standalone financial statements of **Chandi Steel Industries Limited** ("the Company") which comprise the Balance Sheet as at 31st March 2022, and the Statement of Profit and Loss (Including Other Comprehensive income), the statement of change in equity and the Cash Flow Statement for the year ended on that date, and a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the Standalone financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind As") and other accounting principal generally accepted in India, of the state of affairs of the Company as at 31st March, 2022, the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Sr. No.	Key Audit Matters	Auditor's Response
----------------	--------------------------	---------------------------

1.	Revenue recognition	
----	----------------------------	--

	We Identified revenue recognition as a key audit matter because there is an inherent industry risk around the accuracy of revenue recorded by the Company specifically exports of Goods.	
--	--	--

	The company's revenue consists of straight-forward product sales where revenue is recognized when the significant risk and rewards connected with ownership of goods have been transferred to the buyer depending on terms of contract with the customer.	
--	---	--

	Recognizing the Export Revenue is the bigger issue as it depends on the basis of commonly used FOB and CIF.	
--	---	--

	Our audit included a combination of testing of internal control over financial reporting with respect to revenue recognition including procedures relating to business reviews performed by the different business Areas, analytical procedures and detailed test of significant new customer contract. Different contracts may contain different delivery terms that need to be considered in terms of revenue recognition.
--	--

	Our audit also included details test of proof of delivery to confirm that risk had been transferred to the customer. We have in our audit had special focus on revenue recognition with the business area of export of goods.
--	---

	We have verified each and every shipment documents and the exporter's obligation connected with the transfer of ownership of goods to the buyer both in FOB and CIF.
--	--

2. **Measurement of Inventory**

The company keep significant stock of raw materials, consumable stores, spare parts at its production units and stores of finished goods mostly at its sales and distribution centre. Measurement of Inventory is important for a fair representation of gross margin.

It is demanding to prepare accurate reporting of the acquisition cost when procurement, production and logistical processes are complex. Establishing product costing requires many instance of management judgment with effect on the reported values. This includes considering normal production levels, foreign currency and prices of raw materials and allocation of other direct and indirect costs. For finished goods, assessment is needed of obsolescence and how sellable the products are. Finally, there is a complexity in monitoring and measuring volumes particularly for some raw materials and work in progress.

The accounting policies included the company's accounting principles for measuring inventory.

Our audit also included the test verification for entitlement of duty draw back and its recognition.

Based on our work, we had no materials observations for the overall audit on Company's accounting for revenue recognition.

Our audit included but was not limited to the following activities :

Mapped and evaluated selected systems and methodology applied by the management for consistency with prior years and our knowledge of industry practice and tested a sample of key controls for establishing volumes and cost.

Tested, on a sample basis, stocks of raw materials to actual prices. Assessed the reasonableness of the product costing for work in progress and finished goods.

Participated in stock takes at a great number of locations and tested the cut-off of deliveries in or out of inventory.

Testing the estimated future sales values, less estimated costs to sell against the carrying value of the inventories.

Recalculating the arithmetical accuracy of the computations.

Obtained the Management's monitoring controls of slow movers and assessments of obsolescence as well as net selling prices.

Information Other than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexure to Board's Report, Business Responsibility Report, and Shareholder's Information, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or others wise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind As and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone Financial Statements, management is responsible for assessing the company's liability to continue as going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the company's financial reporting process.

Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance in a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatement can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedure responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall representation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statement that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the

adverse consequence of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Management’s Responsibility for Internal financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance

Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those standards and the guidance note require that we comply with ethical requirements and plan and perform the audit to obtain the reasonable assurance about whether adequate internal financial control over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting of the company.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in

conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us the company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”.

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

There are no transfers between levels 1 and 2 during the year.

The group's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

ii) Valuation technique used to determine fair value

Investment in Mutual Fund were valued using quoted market price (i.e., NAV as on 31st March 2022).

Note 40: Financial risk management

The company's activities expose it to market risk, liquidity risk and credit risk. In order to minimise any adverse effects on the financial performance of the company, derivative financial instruments, such as foreign exchange forward contracts, foreign currency option contracts are entered to hedge certain foreign currency risk exposures and interest rate swaps to hedge variable interest rate exposures. Derivatives are used exclusively for hedging purposes and not as trading or speculative instruments. This note explains the sources of risk which the entity is exposed to and how the entity manages the risk and the impact of hedge accounting in the financial statements

Risk	Exposure arising from	Measurement	Management
Credit risk	Cash and cash equivalents, trade receivables, derivative financial instruments, financial assets measured at amortised cost.	Aging analysis Credit Ratings	Diversification of bank deposits, credit limits and letters of credit
Liquidity risk	Borrowings and other liabilities	Rolling cash flow forecasts	Availability of committed credit lines and borrowing facilities
Market risk – foreign exchange	Future commercial transactions Recognised financial assets and liabilities not denominated in Indian rupee (INR)	Cash flow forecasting, Sensitivity analysis	Forward foreign ex. contracts, Foreign currency options
Market risk – interest rate	Long-term borrowings at variable rates	Sensitivity analysis	Interest rate swaps
Market risk – security prices	Investments in equity securities	Sensitivity analysis	Portfolio diversification

The company's risk management is carried out by a central treasury department (company treasury) under policies approved by the board of directors. Company treasury identifies, evaluates and hedges financial risks in close co-operation with the company's operating units. The board provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

(A) Credit risk

Credit risk arises from cash and cash equivalents, investments carried at amortised cost and deposits with banks and financial institutions, as well as credit exposures to wholesale customers including outstanding receivables.

(i) Credit risk management

Credit risk is managed on a company basis. For banks and financial institutions, only high rated banks/institutions are accepted.

For other financial assets, the company assesses and manages credit risk based on internal credit rating system. The finance function consists of a separate team who assess and maintain an internal credit rating system. Internal credit rating is performed on a company basis for each class of financial instruments with different characteristics. Value Ind AS Limited assigns the following credit ratings to each class of financial assets based on the assumptions, inputs and factors specific to the class of financial assets.

VL 1 : High-quality assets, negligible credit risk

- VL 2 : Quality assets, low credit risk
- VL 3 : Standard assets, moderate credit risk
- VL 4 : Substandard assets, relatively high credit risk
- VL 5 : Low quality assets, very high credit risk
- VL 6 : Doubtful assets, credit-impaired

The company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the company compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forwarding-looking information. Especially the following indicators are incorporated:

- i) Internal credit rating
- ii) external credit rating (as far as available)
- iii) actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the borrower's ability to meet its obligations
- iv) actual or expected significant changes in the operating results of the borrower
- v) significant increase in credit risk on other financial instruments of the same borrower
- vi) significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements
- vii) Significant changes in the expected performance and behaviour of the borrower, including changes in the payment status of borrowers in the company and changes in the operating results of the borrower.

Macroeconomic information (such as regulatory changes, market interest rate or growth rates) is incorporated as part of the internal rating model.

In general, it is presumed that credit risk has significantly increased since initial recognition if the payments are more than 30 days past due.

A default on a financial asset is when the counterparty fails to make contractual payments within 60 days of when they fall due. This definition of default is determined by considering the business environment in which entity operates and other macro-economic factors

(B) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, company treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the company's liquidity position (comprising the undrawn borrowing facilities below) and cash and cash equivalents on the basis of expected cash flows. This is generally carried out at local level in the operating companies of the company in accordance with practice and limits set by the company. These limits vary by location to take into account the liquidity of the market in which the entity operates. In addition, the company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

i) Financial Arrangements

The company had not access to the undrawn borrowing facilities during the reporting period:

(ii) Maturities of financial liabilities

The tables below analyse the company's financial liabilities into relevant maturity company based on their contractual maturities for:

- i) all non-derivative financial liabilities, and
- ii) net and gross settled derivative financial instruments for which the contractual maturities are essential for an understanding of the timing of the cash flows.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Note- 41 Capital management

The company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The management seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowing and the advantages and security afforded by sound capital position.

The capital structure is as follows:
